FIRECHIEF ARCHITECTURAL FIRE EXTINGUISHER CABINETS

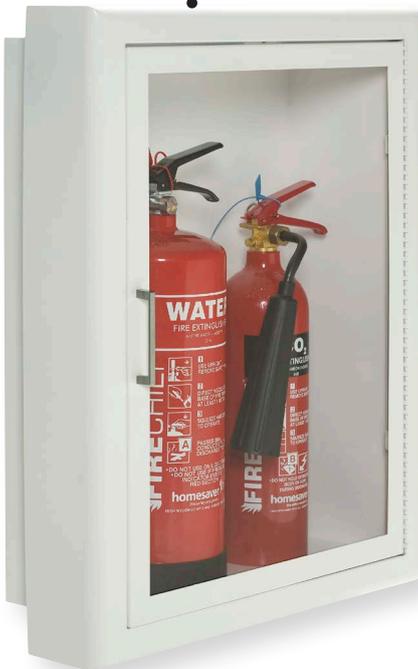

FIRECHIEF®
making the world a safer place

RECESSED CABINETS

The ultimately discreet option, these recessed cabinets offer many possibilities. With a choice of three trim materials, they are ideally suited to the modern interior, for specification at design stage.

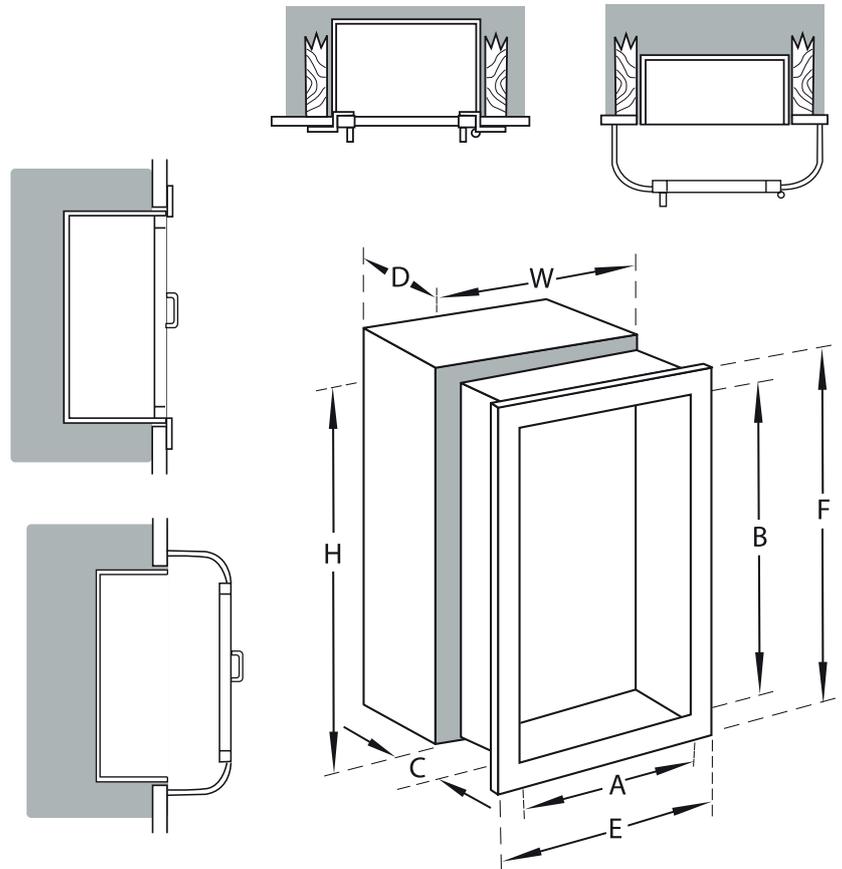

SEMI-RECESSED CABINETS

These cabinets offer a neat option for the treatment of fire extinguishers where wall depth does not permit full recessing. With a maximum projection of only 136mm and requiring a cavity depth of only 90mm or 105mm, they are a consideration for retro-fit type projects.

CABINET CAPACITY

Single cabinets are designed to hold at maximum a single 6 Litre Water with Additive extinguisher (typical rating 21A) or a 6 Litre Foam Spray extinguisher (typical rating 13A 144B).

Double cabinets are designed to hold at maximum two of the above extinguisher types, or more commonly one of the above combined with one 2kg CO2 extinguisher (typical rating 34B).
