Model: **MDM300W**
Code: **114-1154**

MEDICHIEF 300ML MANUAL GEL & SOAP DISPENSER

MEDICHIEF™
making the world a safer place

Robust, low profile design suited to multiple applications.

This sleek wall-mounted gel & soap dispenser is designed to fit in to any environment and provide a robust, tamper-proof solution for hand cleaning and sanitisation. Constructed from rigid ABS plastic, it is designed for repetitive use.

The dispenser has a manual 'pump top' operation, with a dosage volume of 1.9ml, ensuring that the use of soap/gel is efficient and cost effective.

Thanks to its unique anti-tamper design, the dispenser can easily be refilled and maintained. The container is mounted and secured in place by a key-locked base plate that secures to the wall-mounting bracket. To refill, the base plate can simply be unlocked and slid off the mounting bracket, freeing the container to be removed and refilled.

The dispenser is quick and easy to install, delivered with the relevant fixings to wall-mount the product as well as a template to ensure accuracy and save install time.
